

# Index to Volume 84

*This index is in three parts: Title, Subject and Author.*

## Title index

3-D anaglyph images of molecular models (308) 34  
A 21st century science laboratory (309) 87  
A best-fit line using the method of averages (306) 122  
A core concept in teaching chemistry (306) 105  
A cut-out 3-D model of DNA (308) 30  
A time-line for geological time (306) 125  
A tribute to Dick West (307) 126  
An illustration of cladding on optical fibres (309) 24  
Anhydrous aluminium chloride and aluminium hydride (307) 117  
Another look at the condensation bands produced by hydrogen's squeaky pop (309) 13  
Bringing newspaper reports into the classroom: citizenship and science education (309) 121  
Building a 3-D Lego model of DNA (308) 26  
Can the quest for best practice be assisted by formal research? (307) 61  
Changing practice – teachers have to do it for themselves (308) 14  
Charge is not even skin deep (307) 123  
Children's perceptions of school science (308) 109  
Confidence intervals, the mean and Excel (309) 29  
Coverage in GCSE textbooks (308) 16  
Delivering effective training for the Key Stage 3 National Strategy for science (306) 49  
Designing an organism (309) 11  
Discovering DNA (308) 36  
DNA for real: learning about PCR in science centre workshops (308) 49  
DNA in the school curriculum – a poorly exploited asset? (308) 57  
Does ICT in science really work in the classroom? Part 1: The individual teacher experience (309) 105  
Does science education research count? (307) 13  
Down's syndrome: an update and ideas for student research and debate (307) 115  
Ecology fieldwork in 16 to 19 biology (307) 79  
Effective use of the Internet in science teaching (309) 77  
Effective use of ICT in secondary science: guidelines and case studies (309) 53  
Embedding the Key Stage 3 National Strategy for science into departmental practice (306) 59  
Enhancing teaching and learning of science through use of ICT: methods and materials (309) 41  
Evaporation and boiling – trainee science teachers' understanding (309) 131  
Examining the mismatch between pupil and teacher knowledge in acid-base chemistry (308) 81  
First steps in educational research: the experience of student teachers (307) 49  
Franklin and Wilkins – the forgotten pair? (308) 75  
Freeze-thaw weathering demonstrated in a single lesson (306) 121  
Has ICT in science teaching come of age? (editorial) (309) 39  
Ideas and evidence in science: the portrayal of scientists in GCSE textbooks (307) 89  
Improving attitudes to science and citizenship through developing emotional literacy (307) 103  
Investigating the effect of acid on carbonates using a microscale technique (309) 12  
In-vitro fertilisation with a difference: a game of inheritance (308) 39  
Linus Pauling and DNA (308) 22  
Managing data effectively to raise attainment in key stage 3 science (306) 27  
Managing people – the art of science teacher development (306) 17  
Managing health and safety in science departments (306) 33  
Managing science in secondary schools in Ireland (306) 39  
Managing the curriculum (306) 23  
Method of least squares – is it really necessary? (309) 9  
Modelling DNA in the lab (308) 24  
Monitoring progress within key stage 3 (307) 12  
Observing the antimicrobial effects of plastic impregnated with triclosan (306) 119  
One school's experience of the key stage 3 National Pilot (306) 53  
Playing with particles – a teaching approach for A-level (post-16) particle physics (307) 118  
*Powerpoint*: just another slide show or a useful learning aid? (309) 61  
Primary Science Review 2001-2: some themes of interest to secondary teachers (306) 111  
Put the champagne on ice (306) 14  
Rationale and methodology of testing and assessment (308) 12  
Reforming school science education in the light of pupil views and the boundaries of science (307) 71  
Responding to alternative conceptions in the classroom (308) 99  
RNA versus DNA (308) 19  
Science and disease: where life and death intersect (309) 31  
Science education research and practice – does it count? (308) 12  
Science or science education research (308) 9  
Science teachers as researchers – a model for professional development (307) 43  
Science teaching and literacy, part 3: Speaking and listening, spelling and vocabulary (306) 83  
Some modelling ideas for teaching about DNA (308) 24  
Strategies for making effective use of ICT in science lessons (309) 92  
Students' understanding of acid, base and salt reactions in qualitative analysis (308) 89  
Tackling key stage 2 to 3 transition problems – a bridging project (306) 99  
Talk, action and visual communication in the teaching and learning science (308) 117  
Technology in science teacher education (309) 99

The ChemSketch windfall (309) 19  
 The discovery of the double-helix: a brief history of the MRC Laboratory of Molecular Biology (308) 65  
 The Dolly Mixture model of the DNA double helix (308) 23  
 The key stage 3 National Pilot for science – a review (306) 43  
 The method of averages versus the method of least squares (308) 14  
 The nature of science education research (307) 35  
 The role of the head of science in managing the Key Stage 3 National Strategy for science (306) 63  
 Thinking frameworks for planning ICT in science lessons (309) 113  
 Towards evidence-based practice in science education (307) 19  
 Using data effectively to raise attainment in key stage 3 science (306) 33  
 Using *Powerpoint* effectively in science education: lessons from research and guidance for the classroom (309) 69  
 Using the internet for dazzling DNA teaching (308) 45  
 Why is emotional literacy important to science teachers? (306) 97  
 Why professional development should challenge teachers' core beliefs (306) 77  
 Year 6 to Year 8 tracking: investigating the key stage 3 dip (307) 65

## Subject index

acid-base chemistry, mismatch with pupils' understandings (308) 81  
 alternative conceptions, chemistry (308) 99  
 aluminium, compounds (307) 117  
 antimicrobial action (306) 119  
 attitudes to science, pupils (307) 103  
 best-fit line (306) 122; (309) 9  
 chemical equations (308) 89  
*ChemSketch* (309) 19  
 citizenship, and science education (307) 103  
 concept mapping and professional development (306) 77  
 concepts in physics, communicating (308) 117  
 condensation bands, hydrogen (309) 29  
 confidence intervals (309) 29  
 core charge (306) 105  
 CPD and concept mapping (306) 77

Crick, Francis (308) 65  
 curriculum development, pupils' needs (307) 71  
 curriculum, developing schemes of work (306) 23  
 Darwin, Charles (307) 89  
 demonstrations, magnetism (308) 117  
 DfES Best Practice Research Scholarship (307) 61, 65  
 diseases, and science education (309) 31  
 DNA 50, *special issue* (308)  
 DNA, in school curriculum (308) 57 and RNA (308) 19  
 at MRC Laboratory of Molecular Biology, University of Cambridge (308) 65  
 classroom resources (308) 23, 24, 30, 34  
 extraction of DNA (308) 36  
 molecular model (308) 23, 30  
 molecular structure (308) 34  
 paper sculpture (308) 30  
 Pauling's contribution (308) 22  
 using the Internet (308) 45  
 double helix, brief history (308) 65 75  
 Down's syndrome, genetics (307) 115  
 earth science, weathering (306) 121  
 ecology, exercise (309) 11  
 ecology, fieldwork, post-16 (307) 79  
 electric fields (307) 123  
 electrostatic charge (307) 123  
 emotional literacy (306) 97; (307) 103  
*Escherichia coli* (306) 119  
 evidence-based practice (307) 19  
*Excel*, confidence intervals (309) 29  
 Faraday cage (307) 123  
 Franklin, Rosalind, (308) 75  
 game, genetics (308) 39  
 game, particle physics (307) 118  
 geological time (306) 125  
 health and safety (306) 33  
 history of science, and textbooks (307) 89; (308) 16  
 ICT, laboratory design (309) 87  
 ICT, *Powerpoint* (309) 61, 69  
 ICT, technology (309) 99  
 ICT in science education, *special issue* (309)  
 ideas and evidence (307) 89  
 initial teacher training, science teaching (307) 49  
 Internet, DNA, teaching (308) 45  
 Internet, and science teaching (309) 77  
 ISED project (307) 103  
 key stage 2 science (308) 109  
 key stage 2 to 3 (307) 65  
 key stage 2 to 3, bridging (306) 69  
 key stage 3 dip (307) 65  
 key stage 3 management, head of science (306) 63  
 key stage 3 National Pilot (306) 43, 53  
 Key Stage 3 National Strategy (306) 49, 59, 63  
 key stage 3, using data effectively (306) 27; (307) 12  
 King's College London, and the structure of DNA (308) 75  
 Laboratory of Molecular Biology (308) 65  
 Lego model of DNA (308) 26  
 literacy, and science teaching (306) 83  
 magnetic field patterns (308) 117  
 Management and Key Stage 3, *special issue* (306)  
 managing people (306) 17  
 managing science curriculum, in the Republic of Ireland (306) 39  
 method of averages (306) 122; (308) 15; (309) 9  
 method of least squares (306) 122; (308) 15; (309) 9  
 misconceptions, and QA (308) 89  
 misconceptions, classroom resources about (308) 99  
 National Pilot, key stage 3 (306) 43, 53  
 National Strategy, *see* Key Stage 3 National Strategy  
 newspaper reports, and science teaching (309) 121  
 optical fibres (309) 24  
 organism, designing an (309) 11  
 particle physics game (307) 118  
 Pauling, Linus (308) 22  
 performance data (306) 27  
*Powerpoint* (309) 61, 69  
*Primary Science Review*, review of (306) 111  
 professional development (307) 43  
 professional development, Best Practice Research Scholarships (307) 61, 65  
 pupils' perceptions, KS2 science (308) 109  
 qualitative analysis (308) 89  
 researchers, science education (307) 13  
 RNA, versus DNA (308) 19  
 schemes of work, developing (306) 23  
 science centre DNA workshops (308) 49  
 science education research and dissemination (307) 13

science education research and practice, *special issue* (307)  
 science education research, partnerships (307) 43  
 science teaching, and emotional literacy (306) 97; (307) 103  
 scientific literacy and citizenship (309) 121  
 statistics (306) 122; (308) 15; (309) 9 29  
 teacher development (306) 17  
 teachers' views of science education research (307) 35  
 teaching chemistry concepts (306) 105  
 teaching, educational research, impact on teaching (307) 19; (308) 9, 12, 14  
 textbooks, ideas and evidence (307) 89; (308) 16  
 time-line (306) 125  
 training, Key Stage 3 National Strategy (306) 49  
 triclosan (306) 119  
 Wallace, Alfred Russel (307) 89  
 Watson, James (308) 65  
 weathering, demonstrating (306) 121  
 West, Dick, a tribute to (307) 126  
 Wilkins, Maurice (308) 75

Chia, L-S (308) 89  
 Churchill, H (306) 63  
 Clarke, J (306) 59  
 Collins, S (307) 19  
 Crompton, Z (306) 49  
 Dillon, J (306) 7, 17; (307) 43  
 Doneghan C (307) 103  
 Duschl, R (307) 19, 43  
 Edwards, R (306) 23  
 Erduran, S (308) 75, 81  
 Essex, J (307) 61  
 Evans, M (306) 43  
 Evans, S W (308) 23  
 Finch, J J (308) 65  
 Finlayson, H (309) 105  
 Forrest, B (309) 11  
 Gibson, M T (307) 65  
 Glaister, P (308) 14  
 Goh, N-K (308) 89  
 Goodwin, A (309) 131  
 Hames, V (307) 19, 35  
 Harper, E. (309) 87  
 Harrison, S (307) 103  
 Henderson, P (309) 12  
 Heselden, R (306) 83, 121  
 Hind, A (307) 19, 35  
 Hollamby, P (309) 61  
 Hoppé, J (306) 122; (308) 9; (309) 9, 29  
 Hulse, N (308) 39  
 Hutton, T A M, (306) 119  
 Jarman, R (309) 121  
 Jewitt, C (308) 117  
 Jolliffe, A (308) 49  
 Jones, R (309) 13  
 Kilbey, T (307) 103  
 Kinchin, I M (306) 77, 119  
 Kumar, D D (309) 99  
 Leach, J (307) 19, 35  
 Lewis, J (307) 19  
 Lewis, S (309) 84  
 Lock, R (307) 13, 79  
 Madden, D (306) 14; (308) 30, 34, 36  
 Matthews, B (306) 97; (307) 103  
 Masurek, H A (308) 45  
 McClune, B (309) 121  
 Millar, R (307) 19, 35  
 Monk, M (308) 14  
 Mumford, C (309) 19  
 Murphy, C (308) 109  
 Murphy, E (306) 125  
 Murphy, P J (306) 125  
 Newton, L (309) 113  
 Nott, M (307) 127; (308) 75  
 Oldham, V (306) 27; (309) 53  
 Osborne, J (307) 19, 35; (308) 75  
 Palmer, M (306) 39  
 Parkinson, J (309) 61  
 Parrott, M J (307) 12  
 Pickersgill, D (309) 77  
 Ramsden, E N (308) 16  
 Ratcliffe, M (307) 19, 35  
 Reiss, M J (307) 71  
 Rogers, L (309) 105, 113  
 Rowcliffe S (309) 69  
 Ryan, M (306) 69  
 Samuels, G (309) 31  
 Schollar, J (308) 26, 30  
 Scott, P (307) 19; (308) 117  
 Severs, P (309) 12  
 Seymour, J. (308) 39  
 Sindall, M (308) 24  
 Sissling, S (307) 43  
 Souter, N (308) 57  
 Spoores, M (308) 15  
 Spurgin, B (307) 123  
 Staples, R (306) 83  
 Taber, K S (306) 105; (308) 99  
 Talbot, C (307) 115, 117; (308) 19, 22  
 Tan, K-C D (308) 89  
 Tilling, S (307) 79  
 Treagust, D F (308) 89  
 Watson, R (307) 43  
 Wellington, J (309) 39  
 Williams, J D (307) 89

## Author index

Aplin, D G (308) 16  
 Asoko, H (306) 111  
 Auty, G (309) 24  
 Bartholomew, H (307) 19, 35  
 Beggs, J (308) 109  
 Bennett, J (307) 7, 49  
 Bentley, D (307) 127  
 Burrows, P (306) 33  
 Breithaupt, J (308) 16  
 Brown, D (307) 118; (309) 87  
 Broxham, M (306) 53  
 Campbell, B (307) 49  
 Chaplin, M (309) 93  
 Chapman, B R (308) 12
